

```

def cond_ex1(x: float, y: int):
    # conditional
    if y > 10:      # cond0
        z = x * y   # c0
    else:
        z = y       # c1
    return z

```

Version that “prunes” ports (from variables in the environment that aren’t used outside of that environment).
Dashed “Port” boxes represent PortCalls
The directed dashed arrows indicate the PortCall to Port relationships
